---

This webinar delves into the evolving landscape of AI-driven cyber threats and the sophisticated tactics employed by malicious bots. You will gain insights into the latest defense mechanisms and strategies for protecting digital assets and personal information. This session aims to empower individuals and organizations to stay a step ahead in the ever changing battle against cyber criminals.

Tom Kirkham, the Founder and CEO of Kirkham IronTech, offers robust cybersecurity defense systems while fostering a security-first culture through comprehensive training programs. With over 30 years of experience, he serves as a trusted cybersecurity and IT advisor nationwide.

Tom, a two-time Amazon Best Seller, further underscores his expertise in his latest book, "Hack the Rich - A Cybersecurity Parable".
